FARWELL

"Our company has acquired another company, and we don't follow consistent processes." "We collect tons of data; but it's spread across several systems, and we just don't have a clear way to bring it all together for meaningful analysis."

"Our systems are old and difficult to use. Some applications do the same thing in different ways."

BUSINESS + TECHNOLOGY SYNCHRONIZATION

Sync your systems with your goals.

Technology, whether it's an existing system or something new, can challenge an organization's productivity if it's not properly aligned with business processes and goals. Analyze core process flows between business groups. Capture synergies and identify needless complexity so you can translate business needs to objective technology needs and gain efficiencies.

WHY SYNCHRONIZE?

- + Cut through communication clutter increase visibility and collaboration.
- + Right-Fit technology with your business needs to maximize your investment.
- Reduce friction in workflows and increase productivity.
- + Improve employee and customer experience.

+ Increase speed of time to market and realize earnings faster.

BUSINESS & TECHNOLOGY SYNCHRONIZATION PROCESS

Current State & Risk Assessment

Evaluate Solutions & Optimize for Effectiveness Transition & Align Your Business Technology

HOW DOES FARWELL HELP? | FUTURE-PROOF YOUR BUSINESS TECHNOLOGY

RIGHT-FIT DISCOVERY™

Our no cost, no obligation Right-Fit offerings set up organizations for more effective projects. We get up to speed before providing solutions.

SIDE-BY-SIDE PLANNING

We work with you to create an optimal solution that will achieve success. We Right-Fit our recommendations so that your goals are achievable and sustainable.

ROLL-UP OUR SLEEVES EXECUTION

We deliver the right expertise at the right cadence, orchestrating successful outcomes. Using our planning as the guide, you can continually confirm we're creating value. "As a direct result of inefficient or ineffective communication, companies lose between \$11,000 and \$15,000 per employee per year." - CIO INSIGHT Synchronize your business and technology with these proven areas of focus:

ALIGN ON THE PURPOSE OF THE TECHNOLOGY

CURRENT STATE

FarWell evaluates current business processes and technology. Develop a firm understanding of pain points, business needs, and affected stakeholders.

RISK ASSESSMENT

Assess risks associated with your current systems and processes. Identify, categorize, and prioritize risks in order to mitigate or avoid them ahead of time.

INFORMATION & DATA FLOW ANALYSIS

Capture current state process maps that visualize system and data touch-points.

ANALYZE TECHNOLOGY CAPABILITIES & FUTURE STATE

NEEDS ASSESSMENT

FarWell collaborates with stakeholders to align business strategies with modern technical solutions. We evaluate solutions using your criteria.

WORKFLOW ANALYSIS & DESIGN

Develop future state use-case definitions used to construct functional workflows.

CHANGE IMPACT & READINESS PROFILE

Evaluate and understand how new technology will impact the organization. Assess individual and organizational readiness for change.

IMPLEMENT & ADOPT NEW SYSTEMS

CHANGE ADOPTION PLAN

FarWell prepares your organization by equipping your team with a solid vision of future state and a solid support system so your changes stick long-term.

LEADERSHIP READINESS & COACHING

FarWell trains leaders to coach through each phase of change so they can then own training their teams to adoption.

AGILE EXECUTION

FarWell's Agile execution allows for ongoing improvement by delivering feedback to your teams incrementally, saving money and time.
